

Talkdesk sub-processors for US instance deployments

Updated September 2026

The following list identifies the third-party sub-processors and Talkdesk-controlled subsidiaries and affiliates that are authorized to process personal data (using GDPR definitions) within Talkdesk Services.

The list includes the following types of sub-processors:

- Sub-processors associated with services provided by Talkdesk (either core product or specific to some additional products).
- Sub-processors are used for customer support functions such as support services and troubleshooting.
- Talkdesk-controlled subsidiaries and affiliates are obligated to follow Talkdesk policies, including Talkdesk's privacy policy.

Sub-processors associated with services provided by Talkdesk — Core product

#	Company	Service	Processing Country	Purpose
1	Amazon Web Service, Inc	Infrastructure as a Service	USA	The infrastructure provider is used to store data from services provided by Talkdesk. AWS provides the infrastructure, and Talkdesk directly manages the infrastructure, the servers, and the databases.
2	Cloudflare	Network Load Balancer	Customer location	Traffic management and secure services.
3	Fivetran, Inc	Tool for Extracting, Transform, and Load data	USA	Collect data from several sources and transform it into standardized data. This information is used by reporting tools inside Talkdesk products and BI.
4	MongoDB	Infrastructure as a service	USA	Infrastructure provider used to provide a database storage solution that manages the servers and the databases
